

Appendix Two

Control Options

- The ENTRA indoor unit includes a wireless infrared remote control, with wall mount bracket, in the box.
 - o This is the same as before, no change.
- R32 ENTRA has an S21 control connection port (same as the R410A version), so it will work with any optional control that is S21 compatible.
- At this time those controls are:
 - o One Lite DTST-LTE-LA-A (.485758).
 - Wall-mount thermostat, programmable, Wi-Fi.
 - One auxiliary dry heat contact.
 - This is the base wi-fi stat.
 - Base level stat for a base level system, but still pretty full-featured.
 - If they want a wall-mount control, recommend this one.
 - o One Touch DTST-TOU-ADA-A (.487023).
 - Wall-mount thermostat, programmable, Wi-Fi.
 - One dry contact for and IAQ device or auxiliary heating
 - This is the mid-level wi-fi stat.
 - o One Plus TDST-ONE-ADA-A (.472157).
 - Wall-mount thermostat, programmable, Wi-Fi.
 - Two dry contacts.
 - This is the premium level wi-fi stat.
 - o Controller BRC51D61 (.486049).
 - This is a controller, not a stat.
 - Temperature sensing remains in the indoor unit.
 - Wall-mount, limited programmability.
 - o Controller BRC944B2 (.441763).
 - This is a controller, not a stat.
 - Temperature sensing remains in the indoor unit.
 - Wall-mount, non-programmable.
